REJSUD OG INDFAK

Denne release er en såkaldt teknisk release, der retter nogle bagom liggende opsætninger i løsningen.

Der er således ikke tale om ændringer, der vil kunne bemærkes i brugergrænsefladen.

Indholdet i releasen er følgende:

- Denne release retter en fejl, som forhindrede Mercell i at oprette nye intuitioner på IndFak og RejsUd.
- Med denne release tilføjes understøttelse af UBL 2.1 fakturaformat i Fakturamodulet.
